ABSTRAK

Penelitian ini mengkaji implementasi Program Perlindungan Anak Terpadu Berbasis Masyarakat (PATBM) dalam upaya mencegah dan menangani kekerasan terhadap anak di Desa Teluk Bakau Kabupaten Bintan. Penelitian ini bertujuan untuk menganalisis pelaksanaan program PATBM serta kesesuaiannya dengan kebutuhan masyarakat sebagai kelompok sasaran. Penelitian ini menggunakan teori implementasi program dari David C. Korten yang menekankan pada tiga kesesuaian, yaitu kesesuaian antara program dengan kebutuhan pemanfaat, kesesuaian antara program dengan organisasi pelaksana, dan kesesuaian antara organisasi pelaksana dengan kelompok sasaran. Metode yang digunakan adalah penelitian kualitatif dengan pendekatan deskriptif melalui teknik pengumpulan data berupa wawancara, observasi, dan dokumentasi. Hasil penelitian menunjukkan bahwa implementasi program PATBM di Desa Teluk Bakau, Kabupaten Bintan telah berjalan cukup baik melalui kegiatan sosialisasi, peran aktivis PATBM, serta mekanisme pelaporan dan pendampingan kasus kekerasan terhadap anak. Namun demikian, pelaksanaan program masih menghadapi beberapa kendala, seperti keterbatasan sumber daya manusia, anggaran dan belum adanya SOP pelaksanaan program PATBM. Oleh karena itu, diperlukan penguatan dukungan pemerintah daerah serta peningkatan kapasitas pelaksana program agar implementasi PATBM dapat berjalan lebih optimal dalam mendukung perlindungan anak.

Kata kunci: Implementasi Program, PATBM, Perlindungan Anak, Kekerasan terhadap Anak.

**IMPLEMENTATION OF THE COMMUNITY-BASED INTEGRATED
CHILD PROTECTION PROGRAM (PATBM) TO PREVENT AND
HANDLING VIOLENCE AGAINST CHILDREN IN BINTAN REGENCY IN
2024**

ABSTRACT

This study examines the implementation of the Community-Based Integrated Child Protection Program (PATBM) in an effort to prevent and address violence against children in Teluk Bakau Village, Bintan Regency. This study aims to analyze the implementation of the PATBM program and its suitability to the needs of the community as the target group. This study uses the program implementation theory by David C. Korten which emphasizes three suitability: suitability between the program and the needs of the beneficiaries, suitability between the program and the implementing organization, and suitability between the implementing organization and the target group. The method used is qualitative research with a descriptive approach through data collection techniques such as interviews, observation, and documentation. The results of the study indicate that the implementation of the PATBM program in Teluk Bakau Village, Bintan Regency has been running quite well through socialization activities, the role of PATBM activists, and reporting mechanisms and assistance for cases of violence against children. However, the program implementation still faces several obstacles, such as limited human resources, budget and the absence of SOPs for the implementation of the PATBM program. Therefore, it is necessary to strengthen local government support and increase the capacity of program implementers so that the implementation of PATBM can run more optimally in supporting child protection.

Keywords: Program Implementation, PATBM, Child Protection, Violence against Children.
