This study aimed to develop cue cards as a learning medium, especially in English speaking skills. This research is carried out at SMAN 2 Tanjungpinang class XI MIPA 8, which totaled 36 students as research subjects. The development model used is the Borg and Gall model, which in this study is limited to the Product Revision stage. The data collection instruments used questionnaires, validation questionnaires, and student practicality questionnaires. The results of the data analysis showed that the material validation score was 90% with "very good/very valid" and the media validation score was 98% with "very good/very valid". Then, the test score result of the practicality of the media is 80%. In conclusion, cue cards as learning media are very feasible to be used in the learning process and can increase student motivation.
