

ABSTRAK

Sunita Anggreny, 2022 : Pengaruh Total Aset, Modal Sendiri, Modal Pinjaman, Volume Usaha Dan Jumlah Anggota Terhadap Sisa Hasil Usaha Pada Koperasi Simpan Pinjam Di Kabupaten Bintan Periode 2019-2021

Penelitian ini bertujuan untuk mengetahui total aset, modal sendiri, modal pinjaman, volume usaha dan jumlah anggota berpengaruh terhadap sisa hasil usaha pada Koperasi Simpan Pinjam Kabupaten Bintan.

Penelitian ini menggunakan penelitian kuantitatif. Model analisis data dengan menggunakan uji statistik deskriptif, uji asumsi klasik terdiri dari uji normalitas, uji multikolinearitas, uji heteroskedastisitas serta uji analisis regresi linear berganda, uji hipotesis terdiri dari uji secara parsial (uji-t), uji secara simultan (uji F) dan uji koefisien determinasi.

Hasil penelitian ini menunjukkan bahwa terdapat pengaruh total aset, modal sendiri, modal pinjaman dan volume usaha terhadap sisa hasil usaha pada Koperasi Simpan Pinjam Kabupaten Bintan serta tidak terdapat pengaruh jumlah anggota sisa hasil usaha pada Koperasi Simpan Pinjam Kabupaten Bintan. Dari hasil analisis data secara parsial variabel total aset mempunyai pengaruh terhadap sisa hasil usaha. Untuk variabel modal sendiri secara parsial mempunyai pengaruh terhadap sisa hasil usaha. Untuk variabel modal pinjaman secara parsial mempunyai pengaruh terhadap sisa hasil usaha. Untuk variabel volume usaha secara parsial berpengaruh terhadap sisa hasil usaha. Serta untuk variabel jumlah anggota secara parsial tidak berpengaruh terhadap sisa hasil usaha. Dan untuk secara simultan variabel total aset, modal sendiri, modal pinjaman, volume usaha dan jumlah anggota dengan melihat nilai signifikan 0,000 lebih kecil dari 0,05 artinya variabel independen (total aset, modal sendiri, modal pinjaman, volume usaha dan jumlah anggota) mempunyai pengaruh yang signifikan terhadap variabel dependen (sisa hasil usaha). Hasil uji koefisien determinasi (R^2) membuktikan bahwa variabel independen (total aset, modal sendiri, modal pinjaman, volume usaha dan jumlah anggota) mempengaruhi variabel dependen (sisa hasil usaha) dengan presentase sumbangan sebesar 75,8%, sedangkan sisanya dijelaskan oleh variabel lain yang tidak termasuk dalam penelitian ini.

Kata Kunci : Total Aset, Modal Sendiri, Modal Pinjaman, Volume Usaha, Jumlah Anggota, Sisa Hasil Usaha

ABSTRACT

Sunita Anggreny, 2022 : *The Effect of Total Asets, Own Capital, Loan Capital, Business Volume and Number of Members on the Remaining Results of Operations in Savings and Loans Cooperatives in Bintan Regency for the 2019-2021 Period*

This study aims to determine the total assets, own capital, loan capital, business volume and number of members affect the remaining results of operations at the Savings and Loan Cooperative in Bintan Regency.

This study uses quantitative research. The data analysis model uses descriptive statistikal tests, the classical assumption test consists of a normality test, multicollinearity test, heteroscedasticity test and multiple linear regression analysis test, hypothesis testing consists of a partial test (t-test), simultaneous test (F test) and test of the coefficient of determination.

The results of this study indicate that there is an effect of total assets, equity, loan capital and business volume on the remaining results of operations at the Bintan Regency Savings and Loans Cooperative and there is no effect on the number of members of the remaining results of operations at the Bintan Regency Savings and Loans Cooperative. From the results of partial data analysis, the total aset variable has an influence on the remaining business results. For the variable capital itself partially has an influence on the remaining results of operations. For the loan capital variable partially has an influence on the remaining results of operations. For the volume of business variables partially affect the remaining business results. As well as for the variable number of members partially does not affect the remaining business results. And for the variables simultaneously total assets, own capital, loan capital, business volume and number of members by looking at a significant value of 0.000 less than 0.05 means that the independent variables (total assets, own capital, loan capital, business volume and number of members) have significant influence on the dependent variable (remaining results of operations). The results of the test for the coefficient of determination (R²) prove that the independent variables (total assets, own capital, loan capital, business volume and number of members) affect the dependent variable (remaining results of operations) with a contribution percentage of 75,8%, while the rest is explained by other variables which were not included in this study.

Keywords : Total Asets, Own Capital, Loan Capital, Business Volume, Number of Members, Remaining Results of Operations
