Judul Artikel: Statistical Reasoning of Variability In the Narrative Perspective of Students

Dear Desi Rahmatina

The paper "STATISTICAL REASONING OF VARIABILITY IN THE NARRATIVE PERSPECTIVE OF STUDENTS" has been preliminarily reviewed.

Some considerations:

- 1) The paper has good potential for being published but needs improvements in almost all sections.
- 2) The abstract is incomplete;
- 3) The introduction needs more details and examples.
- 4) The MATERIALS AND METHODS need more details. It is very confusing and difficult to read. If someone tries to replicate the experiment it will not be possible.
- 5) Number of references need to be increased;
- 6) our screening has detected 371 issues on English grammatical, correctness, clarity, and engagement errors. In case these issues persist in the next version of the paper, an extra fee will be charged as shown in the Journal's publication fees <http://www.deboni.he.com.br/Revisia_solo/entaxas.htm> as a proofreading check.

Please have a look at the attached file to see what should be improved for being reviewed again. Please, use this file to make all necessary changes and, if possible, highlight in yellow all changes. This will speed up the review process.

I will wait for the reviewed and improved version.

Should you need any further information, please do not hesitate to contact me. Please, feel free to contact me with any questions or comments on my WhatsApp or Telegram. (+44 07761951507).

I am looking forward to hearing from you.

Best regards

Eduardo Goldani

to Journal

Dear Prof. Eduardo Goldani,

Thank you for your comments on our article. We will improve the article as suggested by the reviewer.
I am willing to pay extra fees if the next paper has more than 100 grammatical errors.

Thank you very much for your help.

Yours sincerely,

Desi Rahmatina

Dear DESI, I am Luis De Boni. I am working on your manuscript. Over 400 grammar issues were identified, please approve or decline all the modifications proposed. In addition, the manuscript should be modified in the following direction:

a) Use the proper words to describe "commognitive". Even with the manuscript being interesting, linguistics is not one of the areas that this journal covers. Therefore, if this word can not be removed, this manuscript can not be considered for publication.

Thank you, Luis De Boni.
